

NAME:

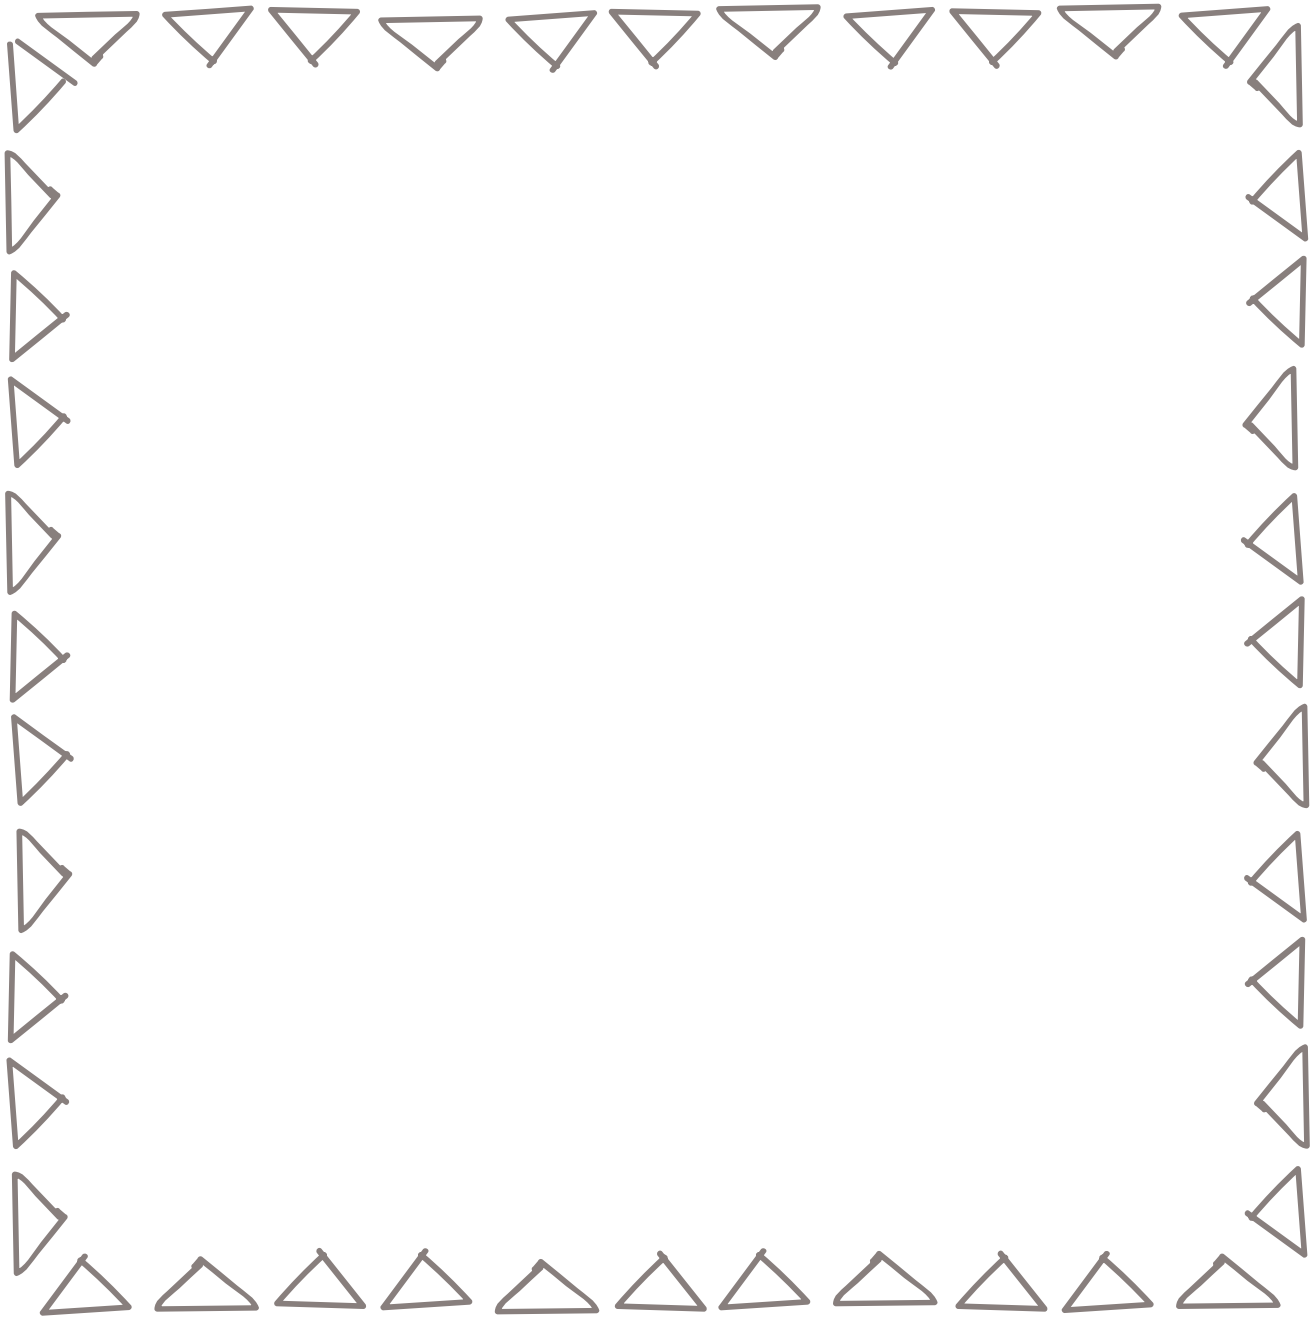

NEIGHBORHOOD NATURE

Parks are a great place to see nature, but you can also see nature from your own school and home! In the spaces provided, draw maps of your school and home. Be sure to include all of the natural things you can think of. Think trees, flowers, grass, gardens, animals (big and small), and more.

EXAMPLE

MY SCHOOLYARD

What types of plants does your school have? Do you think any animals might live near them?

What would you change about your schoolyard to help more animals live there? Think about what animals need to survive.

MY HOME

What is your favorite place outside at your house? What do you like to do there?

Have you ever seen animals near your house? What animals do you think might live there?
(Hint: think big and small!)
